My Next Steps

By: Bryan Busch, NWO Chrysalis #20

When I went on this recent flight I was excited because I had wanted to go for about a year, but I never had the time. I had been frowning in my faith for the year before my flight because I had friends go on their own flights and they shared what they learned with me and I liked what I heard.

When the weekend of my flight was over I learned a lot and became more comfortable sharing God's love with others. The weekend taught me that it would be a difficult task, but rewarding. I agree with that because since I've been home I find that many more people like to obey the world's image instead of what God wants. What others think should not stop us from praising God because his love is love is infinite. Love you all and De Colores.

- Bring the caterpillar to the weekend on Friday morning, along with 2 -2 liters and 2 snacks for the weekend
- Attend sponsor's hour on Friday morning, Candlelight on Saturday night and Closing on Sunday
- Accompany your butterfly to their after flight reunion.
- Help your butterfly become active in a share group
